## **Setting the Maximum Capacity for JMoF 2026** **On-Site Registration**

JMoF is announcing that it will be implementing a capacity limit on the number of JMoF 2026 on-site registrations accepted, and making on-site registration only available by reservation beforehand.

Thanks to everybody's support, at the time of the recent cutoff for pre-registration, JMoF 2026's participation numbers are expected to greatly exceed those of the previous JMoF 2025. This year, we had announced beforehand on the JMoF official website that "if the number of pre-registrations exceeds expectations, we may not do on-site registrations on the days of the event". After careful consideration regarding event operations on the days of the convention, we have decided that since there is a certain amount of capacity remaining, we will be accepting on-site registrations. However, for this year's on-site registrations, a reservation in advance for an on-site registration spot using the participation registration system ConCat is required.

Furthermore, when the amount of reservations for on-site registration reaches the limit, we will stop accepting reservations. In this case, those who come on the days of the convention without a reservation will be unable to register to participate. We kindly ask for your understanding in this matter.

Details regarding reservations for on-site registration will be published on the JMoF official website after preparations are completed.

Sincerely,

JMoF Executive Committee
